Work Experience

Funfinder

Jan 2021- july 2023

Funfinder is a web app that recommends places to visit based on budget and has social media features for posting, liking, commenting, and writing reviews about places. I used react js with Matrial ui front end and express js ,MYSLQ and sequlize Orm back end.

E commerce website, Personal Project

May 2022 - July 2022

I used HTML, CSS, and Javascript to develop an e-commerce website with a node js back end and ejs template engine. It was a full-stack website that aided customers in making online

purchases.
